

Standards of Practice

FOR REGISTERED NURSES

2017

STANDARD 1

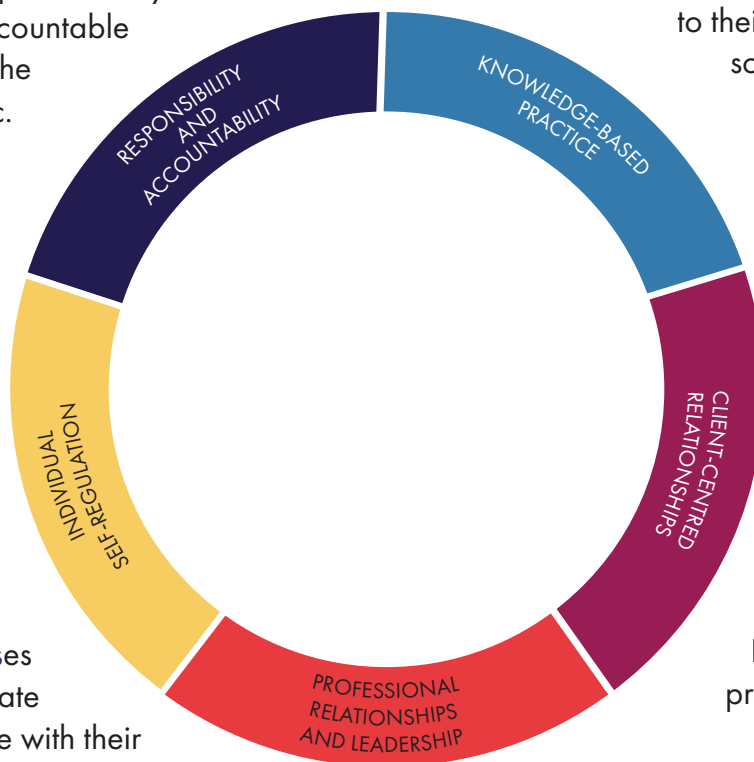

Responsibility and Accountability

Registered nurses are responsible to practise safely, competently, compassionately and ethically and are accountable to clients, the employer, the profession and the public.

STANDARD 2

Knowledge-Based Practice

Registered nurses practise using evidence-informed knowledge relevant to their legislated and individual scope of practice to provide client-centred nursing care and services.

STANDARD 5

Individual Self-Regulation

Individual registered nurses are accountable to regulate themselves in accordance with their legislated and individual scope of practice.

STANDARD 3

Client-Centred Relationships

Registered nurses establish professional and therapeutic relationships using a client-centred approach.

STANDARD 4

Professional Relationships and Leadership

Registered nurses establish professional relationships with health care team members and demonstrate leadership to deliver quality nursing and health care services.
